Aloha BOE,

I'm a concerned teacher at Kalāheo High School, which has an inoperable fire alarm system. I'm concerned that during the most recent fire drill the alarm did not sound in many parts of the school. We want a working fire alarm system and should have a safe working and learning environment for all.

In addition I've noticed that Kalāheo High School is not on the DOE's list of schools with inoperable fire systems, when it's clear the system does not work. The most recent fire inspection report from 12/4 says the fire alarm system is inoperable, please update public information and reports accordingly.

Mahalo,

Laurel Bruce
