

STATE OF HAWAI'I  
DEPARTMENT OF EDUCATION  
P.O. BOX 2360  
HONOLULU, HAWAI'I 96804

OFFICE OF THE SUPERINTENDENT

November 21, 2019

TO: The Honorable Kenneth Uemura  
Chairperson, Finance and Infrastructure Committee

FROM: Dr. Christina M. Kishimoto Superintendent

SUBJECT: **Committee Action on Department of Education's repair and maintenance priority list (FIC Strategic Priority 2)**

Executive Summary

As part of the Board of Education, Finance and Infrastructure Committee's (FIC), Strategic Priority 2, the Department of Education (DOE) is tasked with developing and recommending a draft R&M priority list, as noted in the August 15, 2019 meeting agenda item:  
[http://boe.hawaii.gov/Meetings/Notices/Meeting%20Material%20Library/FIC\\_20190815\\_Action%20on%20work%20plan%20and%20timeline%20for%20FIC%20Priority%202%20%281%29.pdf](http://boe.hawaii.gov/Meetings/Notices/Meeting%20Material%20Library/FIC_20190815_Action%20on%20work%20plan%20and%20timeline%20for%20FIC%20Priority%202%20%281%29.pdf)

The Repair and Maintenance (R&M) program has historically relied on a project identification and funding allocation process which did not necessarily align to current concepts and strategies around equity and access. A new prioritization methodology is proposed to better identify critical R&M projects that need to be addressed as well as equitably allocate funds to give preference to disadvantaged schools, as defined by socioeconomic and academic need.

History of subject matter

The August 15, 2019 FIC Meeting established the framework for creating a R&M priority list identifying this draft priority list submittal.

Purpose of Report

This draft R&M priority list and methodology is a deliverable of the work plan presented in the August 15, 2019 FIC meeting.

The Honorable Kenneth Uemura  
November 21, 2019  
Page 2

List Key Issues

R&M prioritization historically did not address equity in regards to socioeconomic and academic need. With a historical process that didn't align to concepts and strategies around equity and access, as well as specific budgetary requests and line items added to departmental priorities, schools continue to fall behind in maintenance. A change in the R&M prioritization is needed to rectify the matter.

Discuss any financial impact evident in subject matter

The backlog as it was implemented continues to exceed the levels of funding needed to maintain the schools. It is believed the proposed prioritization method would better target available funds to address the most pressing needs.

Describe any community or public engagement

A conversation with several principals regarding equitable facilities occurred in October. Principals expressed a desire to have "basic needs" of their schools addressed (i.e., electrical, plumbing, roofing, safety, compliance, etc.). Some of the principals mentioned that there was a greater concern of adequacy with regards to resources to accomplish basic needs.

Provide a recommendation if action is required

The DOE recommends approval to implement the proposed R&M prioritization process.

Proposed Prioritization Method

The DOE proposes to prioritize R&M projects utilizing a standard of good repair, coupled with preference given to disadvantaged schools as defined by their classification as a Title I school.

The DOE proposes to adopt the Facility Inspection Tool (FIT), developed by the California Office of Public School Construction, to guide R&M activities. The FIT focuses on maintaining existing systems to ensure safe operation. (<http://www.cashnet.org/wp-content/uploads/2018/03/FIT-Guidebook-1.pdf>). The FIT should be based upon a Facility Condition Index (FCI), determined through a Facility Condition Assessment. As the DOE is in the process of implementing the condition assessment, the current R&M backlog is used as a proxy in the interim.

The prioritization process is summarized below:

- FIT - Objectively identify deficient existing facility systems based on a standard of good repair. The focus is to ensure specific sub-categories of facilities are operating safely, not necessarily adequately.
  1. Life safety systems (fire safety, hazardous materials)
  2. Utility infrastructure (gas, electric, plumbing)
  3. Thermal comfort (air conditioning)

4. Core building elements (structural, doors, windows, roofs)
5. Minimize impacts to student use (playgrounds, grounds)

Identification of needs should be based on a FCI, however, the existing R&M backlog can be used as a proxy until the FCI is established.

- Budget Prioritization and Allocation - Proportion available R&M funding to ensure all needs are being addressed. Available funding to be allocated based on:
  1. FIT priorities;
  2. Age of backlog projects; and
  3. School disadvantaged status.
- Fiscal Year 2020 Budget - The following is a possible prioritization of R&M projects to illustrate the proposed methods. Note the Department has already established a priority list of R&M projects based on current practices.
  1. \$110M R&M budget;
  2. Proportion the R&M budget to an 80/20 split between FIT/non-FIT priority projects to ensure progress is made in all areas needing repair and maintenance;
  3. Give preference to the 64 percent of schools that are classified as disadvantaged;
  4. Prioritize the projects within these subgroups based on age; and
  5. Resulting budget allocation:
    - o \$56.1M – FIT projects at preferential schools;
    - o \$31.9M – FIT projects at non-preferential schools;
    - o \$14.0M – non-FIT projects at preferential schools; and
    - o \$ 8.0M – non-FIT projects at non-preferential schools.

Projects are prioritized based on the four categories above and are presented on the attached listings.
