

POLICY E-102

ACADEMIC MASTERY AND ASSESSMENT

A critical dimension of a quality educational program is the extent to which the achievement of students can be measured, compared with progress over time and to standards, and continuously improved.

The Department shall ensure that all students are gaining the academic skills they need to succeed on the K-12 pathway and throughout their lives by:

- Implementing a standards-based system of education that incorporates high expectations for all students; and
- Developing systems for assessing, measuring, and reporting student progress to provide students with support, for school improvement, and for public reporting.
